# **Situational Awareness Report: Ebola Monitoring**

December 18, 2014

Report Number 7

## **Current Confirmed Cases**

<b>Massachusetts:</b>	There are 0 confirmed cases in Massachusetts
<b>New England:</b>	There are 0 confirmed cases in New England
<b>National:</b>	There are 0 confirmed cases in the U.S.
<b>International:</b>	The disease continues to affect the populations of Sierra Leone, Guinea, and Liberia. CDC recently added Mali to the list of affected countries. As of December 18, the WHO reports: Total Cases: 18569; Laboratory-Confirmed Cases: 11775; Total Deaths: 6900

While there are no cases of Ebola in Massachusetts, and the risk remains extremely low, one of our most important responsibilities for the Commonwealth is preparedness.

Massachusetts continues to prepare for the low, but present risk of Ebola based on facts, science and guidance from experts at the Centers for Disease Control and Prevention (CDC). The Massachusetts Department of Public Health (MDPH) and the Massachusetts Emergency Management Agency (MEMA), working with our partner agencies, have held numerous briefings with media and the Legislature, conducted conference calls with nearly 5,000 health, public safety and emergency management personnel, and used the state alert network and social media to reach tens of thousands of residents across the Commonwealth to educate them about Ebola.

## **Massachusetts Ebola Unified Command:**

- Several workgroups were established to coordinate planning efforts by MDPH and MEMA. These workgroups will continue to meet as needed throughout our planning efforts.
  - **Public Safety Leadership**
  - **Personal Protective Equipment (PPE)**
  - **Training**
  - **Transportation**
  - **Legal Working Group**
  - **Law Enforcement Regional Response Working Group**

## Department of Public Health:

MDPH continues to work with the eight hospitals in the collaborative system that will serve as the Ebola assessment hospitals to test persons under investigation for Ebola and treatment centers for any Ebola cases that present. A planning session was held on December 15<sup>th</sup> to review the CDC REP Team visit and to discuss a draft protocol for transfer of suspected Ebola virus cases to an identified tertiary hospital for inpatient treatment.

MDPH has conducted site visits to Massachusetts General Hospital, Baystate Medical Center, Boston Children's Hospital and Boston Medical Center. Additional visits to the remaining collaborative hospitals will be planned in December and early January.

- Office of Preparedness and Emergency Management (OPEM)
  - On December 18<sup>th</sup> OPEM hosted the weekly Ebola update call for public health, healthcare, public safety, colleges and universities, community health centers, EMS and other partners. 291 lines were in use.
  - OPEM continues to monitor its email address for question, concerns or other issues related to Ebola, [AskEbola@state.ma.us](mailto:AskEbola@state.ma.us). As of December 18<sup>th</sup>, 104 messages have been received and responded to.
- Bureau of Infectious Disease (BID)
  - The State Epi-on-Call is available to assist with any specific questions pertaining to follow-up with individuals identified as at risk for developing Ebola virus disease and guidance regarding isolation and quarantine as indicated.
  - For assistance in assessing whether an individual meets the criteria for a suspect case of Ebola individuals are asked to call MDPH at 617-983-6800 (24/7 Epi-on-Call line).
  - During the past week, 6 calls were received pertaining to Ebola.
- Hinton State Laboratory Institute
  - On December 18<sup>th</sup> a *Packaging & Shipping: Division 6.2 Hazardous Materials* course was conducted for hospital personnel. 22 out of 40 hospitals, a total of 40 individuals, participated in the course.
  - The Hinton State Laboratory Institute (HSLI) will be hosting a walk through and sharing of best practices with the Vermont Public Health Lab to assist with their Ebola test implementation. There are currently 53 city, county and state public health laboratories within the U.S. that are capable of performing the Ebola test including the HSLI. A total of 77 Ebola tests have been performed nationally in 20 different labs.

## **Massachusetts Emergency Management Agency**

MEMA continues to be actively engaged with public safety partners on various Ebola preparedness activities.

MEMA, in collaboration with the Law Enforcement Regional Response Working Group, has finalized a Plan for regional law enforcement response to individuals who have or are suspected to have Ebola and require law enforcement intervention. Under the Plan, the Department of Fire Services (DFS) will provide training in the use of PPE to the State Police and police officers assigned to regional emergency response teams, and caches of PPE for the trained officers will be stored on DFS's regional hazardous materials response trucks. Hazardous materials response teams will deliver the PPE to a scene and supervise the donning and doffing of the PPE. DFS will supply the PPE to the regional caches using state homeland security funds repurposed to it by MEMA and EOPSS.

First responders are reminded that when conducting an initial assessment of a person who has a travel history or symptoms that raise a concern about whether the person may have Ebola, the on scene personnel (police, fire or EMS) should immediately contact the MDPH Epidemiology Program at 617-983-6800 and public health personnel will assess whether the individual meets the criteria for consideration as a suspect case of Ebola. Additionally, on-scene personnel may request assistance by calling the MEMA Communications Center at 508-820-2000.

MEMA continues to post information for the public safety community about Ebola on its website at [www.mass.gov/MEMA](http://www.mass.gov/MEMA). Public safety personnel should check the website on a regular basis for informational bulletins, advisories, and guidance on managing suspected or diagnosed cases of Ebola.

### **Upcoming Activities:**

- The next weekly statewide Ebola update call will be held during the week of January 5<sup>th</sup>. Once a day and time is confirmed it will be announced via the HHAN listservs.
